

Dear Physics Student,

The National Institute for Theoretical Physics (NITheP) hosts an internship program. Under this program you can apply for financial support to spend university recess periods at the NITheP nodes at Stellenbosch University, the University of Witwatersrand and the University of KwaZulu Natal or with one of the NITheP associates of whom a comprehensive list can be found on our webpage at <http://www.nithep.ac.za/5.Associates/current.php>.

During this period you will complete a project under supervision of a NITheP staff member or an associate. This project may, if approved by your host department, be used for credits.

This is a call for applications for the June-July recess 2010. The next opportunities will be during November-December 2010, and January 2011. To apply please complete the attached application form.

The application must be accompanied by a complete study record. The successful candidates will be offered a choice of projects at a NITheP node or with one of our associates. The following grants will apply: travel, accommodation and daily allowance.

For more information about NITheP, please visit our website on [www.nithep.ac.za](http://www.nithep.ac.za)

Please direct all further enquiries to René Kotzé on 021-808-2653.

Kind regards
